

Advanced Detoxification Formula

Testimonial:

I did the GliSODin Skin Nutrients - Advanced Detoxification Formula and I found this 2 week treatment program very easy to follow.

After drinking each package (both compartments mixed together) every morning and evening, I found it to have a mild aftertaste, lasting maybe 10-20 seconds but quickly dissipated shortly thereafter.

The taste of the actual drink was not bad at all, very berry tasting, so quite nice.

In the first week I noticed a little more blemishes on my face than usual, by the second week they were gone, as well as my redness.

Then I noticed the skin on my face a little more hydrated and glowing, with some reduction of my fine lines around my eyes.

I especially noticed on my hands-(as I have mild eczema) that they didn't feel as dry, and it helped/assisted in some of the healing.

In helping assist with the weight loss, I can say that it did truly help. I started this program at 120lbs. and my final weight was 116.5, truly amazing.

Having to get up in the early morning hours for work before this program I felt a little tired and sluggish to start my day, but after taking that morning cup, it definitely gave me that additional level of energy much needed throughout the day and evening.

The most I really loved about the Program was the energy I had throughout the day, both mind and body.

I highly recommend this Advanced Detoxification Program!
