DIETARY SUPPLEMENT

GliSODin Skin Nutrients, Toronto, introduces Advanced Slimming Formula, which, according to the company, can help reduce body fat,

increase lean to fat mass ratio, promote healthy metabolism, support healthy diges-

tion while controlling excess absorption of sugars and fats, and help reduce oxidative stress associated with weight loss. Its key ingredients include rice, seaweed, green coffee, melon, safflower, and pineapple; as well as nutraflora prebiotics, a natural source of soluble fiber. Each 690-gram supplement has a natural blueberry-blackberry flavor.

For more information, contact GliSODin Skin Nutrients, (866) 534-5868; www.glisodinskin.com.
